Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

A preliminary examination of this application reveals that it includes terminology, which is so different from that which is generally accepted in the art to which this invention pertains that a proper search of the prior art cannot be made. For example: Inhomogeneous.

Applicant is required to provide a clarification of these matters or correlation with art-accepted terminology so that a proper comparison with the prior art can be made. Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claims 12 and 20, it is unclear what is meant by inhomogeneous. Inhomogeneous is not in the dictionary.

As to claims 12 and 20, it is unclear what applicant regards as a contact point.

As to claims 12 and 20, Applicant should place a semi-colon after comprising, A and An should be in lower case and a semi-colon place after vibration and tissue.

As to claims 14 and 22, it is unclear how having an elastic modulus varies in a helical manner throughout the portion.

As to claims 15 and 23, it is unclear how applicant varies the density in a helical manner throughout the portion.

As to claims 19 and 26, it is unclear what applicant regards as a hollow passageway. What is its reference numeral? How is the contacting tip and point of contact for receiving longitudinal vibration joined by a hollow passageway?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 12 rejected under 35 U.S.C. 102(e) as being anticipated by Boukhny U.S. Pat. No. 6,077,285.

Art Unit: 3763

Boukhny discloses a contact point (the eye); a tip (12) and an inhomogeneous portion located between the contact point and the tip (fig. 1).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-18 and 20-25 rejected under 35 U.S.C. 102(b) as being anticipated by Hood
U.S. Pat. No. 5,318,570.

Hood discloses a longitudinal-torsional resonator comprising: a contact point (the body); a tip (331, 534); an inhomogeneous portion located between said contact point and said tip (figs. 42 and 93-97; as to claims 14-18 and 20-25, (figs. 42 and 93-97).

Allowable Subject Matter

Claims 19 and 26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Kevin C. Sirmons whose telephone number is (703) 306-5410. The examiner can normally be reached on Monday - Thursday from 6:30 am to 4:00 pm. The examiner can also be reached on alternate Fridays.
